A recruitment procedure is open to hire PhD researchers in the framework of the project SPIRS.

Requirements (qualifications and skills)

- PhD degree in the field of microelectronics, digital systems, or similar;

- English language at a level that allows writing scientific papers, technical reports, and giving presentations at scientific conferences and SPIRS meetings;

- Ability to think analytically and organizational skills;

- Strong self-motivation for scientific work, self-reliance, creativity, and leadership;

- An additional advantage will be scientific achievements (scientific articles published in journals) and previous experience in research projects related with semicustom Digital Design (FPGA and ASIC);

- Previous experience with interdisciplinar and international teams will be highly appreciated.

Offer description

- Full-time contract for initial 12 months with the possibility of extension up to 36 months. Salary will depend on experience, according to CSIC's salary scale.
